

Bridging the Gap
Between Technology and Industry

BULK BAG LOADER

We design our bulk bag loaders (BBL) to be high quality, heavy-duty, and easy to use. Standard units include 4" heavy-duty frame with forkguides for transporting and adjusting. We construct our standard units with high-strength alloys and our premium units with either stainless steel or high-strength aluminum alloys to provide the strongest BBL in the market. Includes fully adjustable hook positions and adjustable frame to fit all bag sizes.

Features Include:

- Heavy-duty construction using stainless, mild steel, or aluminum;
- Welded construction for maximum strength;
- Floor mounting pads for ease of installation;
- 4,000 pound capacity;
- Adjustable bag height, maximum standard frame height is 8';
- Adjustable hooks for varying bag sizes;
- Adjustable lower tray allows frame to maintain height and eliminates bellows connections to hoppers above;
- Gain-in-weight control package includes inflatable bag-neck-bladder, digital display, fill valve all connections;
- Shipped fully assembled;
- Modular design facilitates upgrading or modifying unit;
- Available with platform scale, loadcells, or volumetric filling heads.

Options Include:

- Volumetric only design;
- Densifying tables;
- Pneumatically adjustable bag height adjustment;
- Vibrator agitation;
- Custom designed units;
- Infeed/outfeed roller conveyors and pallet dispensers.
