

## Blower Packages

We design our blower packages to provide you the best combination of components for extended life, quality, and minimal maintenance. We build our packages with an integral base and discharge silencer or a structural steel base with separate silencers. Our engineers will size the silencer, blower, and filter to your performance specifications to obtain maximum sound attenuation, minimum horsepower and minimum overhung load.

### Features Include:

- Rotary Positive Displacement Blowers
- Standard Inlet and Discharge Silencers
- Inlet Filter/Silencer
- Flex Connector(s)
- V-Belt Drive
- Weighted Relief Valve
- TEFC Motor
- Adjustable Motor Base
- Pressure Gauge
- Paint
- Operating Manual
- 2-Year Warranty

#### Accessories/Options may include:

- Sound Enclosure
- Weather Hood
- Expansion Joints
- Check Valve
- Butterfly Valve
- Vacuum Unload Valve
- Pressure Switch
- Temperature Switch
- Differential Gauge
- Temperature Gauge
- Spool Pieces
- Explosion Proof Motor
- Special Paint or Powdercoating
