# Bulk Bag Loader

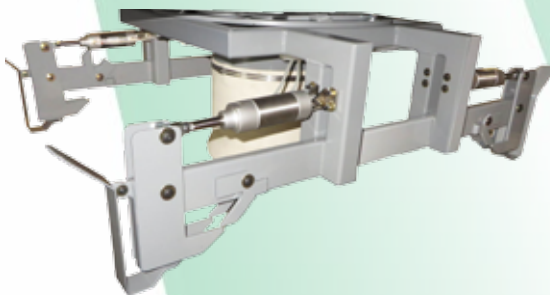

We design our bulk bag loaders (BBL) to be high quality, adjustable, and easy to use. Standard units include a 4" heavy-duty frame with fork guides for transporting and adjusting. We construct our standard units with high-strength alloys and our premium units with either stainless steel or high-strength aluminum alloys to provide the strongest BBL in the market. Includes fully adjustable hook positions and frame to fit all bag sizes.

## Features

- Heavy-duty welded construction using Mild Steel. Standard frame is 8". Stainless or aluminum also available;
  - 4,000 lb. capacity;
  - Adjustable lower tray allows frame to maintain height and eliminates bellows connections to hoppers above;
  - Gain-in-weight control package with digital LED display;
  - 14" Inflatable bag-neck-bladder for dust control accommodates up to 16" spouts. Other sizes available;
  - Inflatable seal with manual control for bag sealing;
  - Adjustable hooks for various bag sizes;
  - 10 1/2" Inlet Spout, 10" Stub for Process, 8" Discharge Spout;
- Options Include:
- Densifying tables with Vibrator agitation;
  - 10" Gate Valve with dribble control;
  - Volumetric only fill design;
  - 4 x 1000 lb. Supermount Loadcell Module;
  - Rotating Head with pneumatic release.
