

## Bulk Bag Loader

We design our bulk bag loaders (BBL) to be high quality, adjustable, and easy to use. Standard units include a 4" heavy-duty frame with fork guides for transporting and adjusting. We construct our standard units with high-strength alloys and our premium units with either stainless steel or high-strength aluminum alloys to provide the strongest BBL in the market. Includes fully adjustable hook positions and frame to fit all bag sizes.

### Features Include:

- Heavy-duty welded construction using stainless, mild steel, or aluminum;
- Floor mounting pads for ease of installation;
- 4,000 lb. capacity;
- Adjustable bag height, max. standard frame height is 8';
- Adjustable hooks for varying bag sizes;
- Adjustable lower tray allows frame to maintain height and eliminates bellows connections to hoppers above;
- Gain-in-weight control package with digital LED display;
- 10" Gate Valve with dribble control;
- 14" Inflatable bag-neck-bladder for dust control accommodates up to 16" spouts. Other sizes available;
- Inflatable seal with manual control for bag sealing;
- 10 ½" Inlet Spout, 10" Stub for Process, 8" Discharge Spout.

### Options Include:

- 4 x 1000 lb. Supermount Loadcell Module
- Volumetric only fill design;
- Densifying tables with vibrator agitation.
